***Detailed Action***

***Response to Amendment***

1. Applicant's arguments filed on 7/27/2007 regarding claims 22-29 have been fully considered. Claims 1-21 have been cancelled by applicant.

***EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE***

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a method for associating a training code to a channelization code for use in communications between a mobile terminal and a base station in a mobile telecommunication system, including the unique steps of:

“wherein the mobile terminal is operating in an uplink mode, and  
the mobile terminal selecting at random a Channelization code from a plurality of available Channelization codes,  
the predetermined selection process being such that the Training code selected for transmission to the base station is determined by the Channelization code selected, and  
the set of rules applied to the Training code upon detection by the base station being such that for each Training code detected the Channelization code used to encode the data received with that Training code is known.”

The closet prior art, Sugita (USP 6,041,124), discloses a method for communications between a mobile terminal and a base station in a CDMA system, comprising the transmission of spreading code of the pilot channel (training code) and the detection of the timing of the

spreading code (training code) of the pilot channel or the PN code (channelized code). However, Sugita fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
